Abstract

The following documentation concerns our online store, where you can find clothing and shoes for all ages. It is quite user friendly and can be easily browsed. All individual pages of the site are explained below in detail.

Below you can see the home page that the user sees.

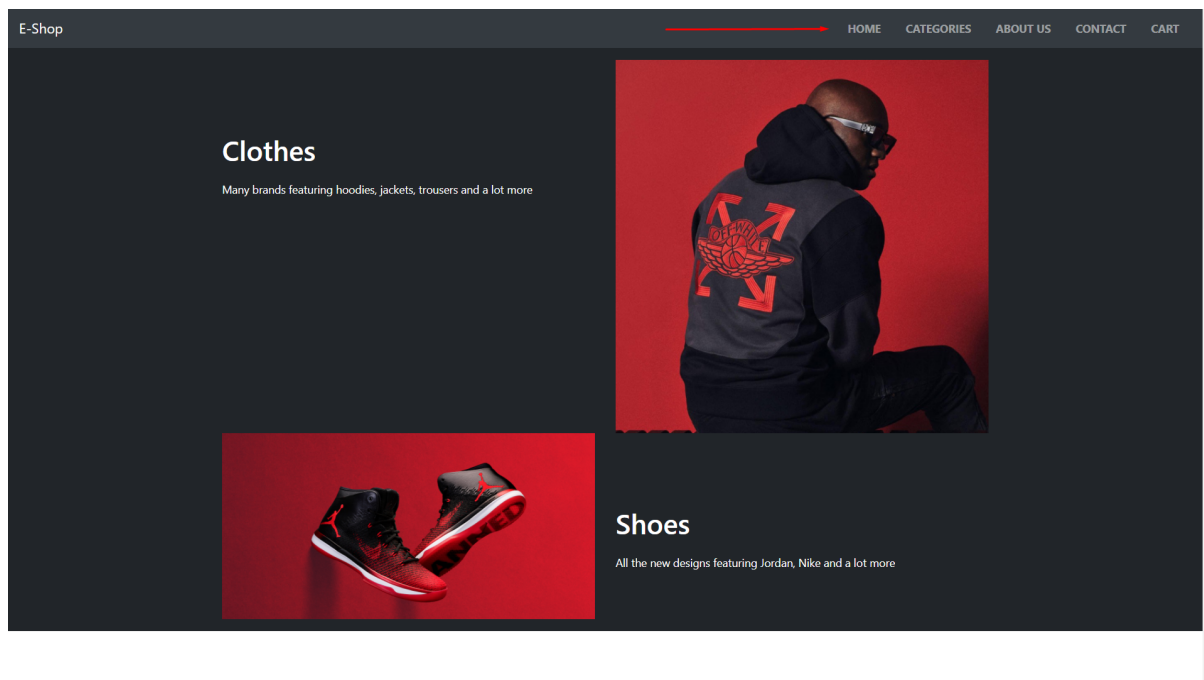

Contents

1	Home	1
2	Categories	2
3	List	3
4	About Us	4
5	Contact	5
6	Cart	6

1 Home

On our home tab, the user can see some nice photos from our top products. Also, he can browser throught the page via top-bar on "categories", "about us", "contact" and his cart in order to checkout. I have already marked them via a red arrow. If the user clicks on each button, he is redirected at the specific tab.

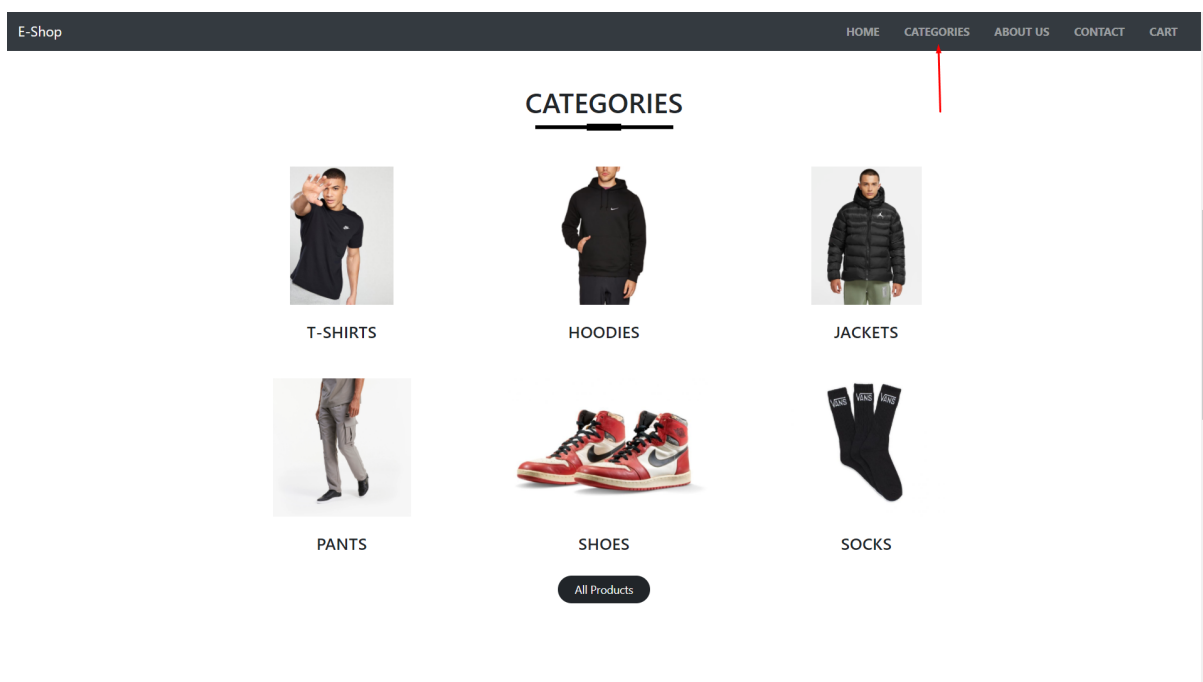

Below you can see the home page that the user sees.

2 Categories

We have splitted our products on 6 categories in order to be user-friendly. A red arrow indicates how to get to the categories tab and see our products. If user clicks on it, he will be redirected at same page but on the categories section.

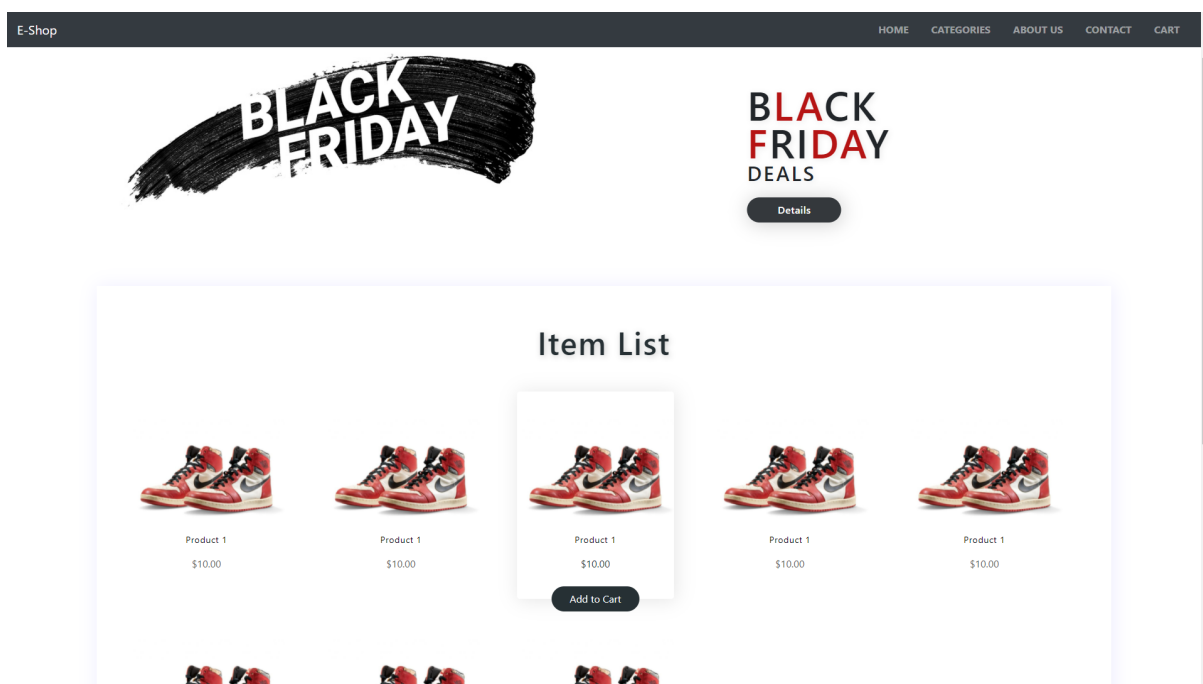

This is how the categories section looks like.

3 List

At the item list the user can see all of our products, in the selected category. If you want to order them, he can add them to the cart via the "add the cart" button, which appears when the user hovers over the desired product.

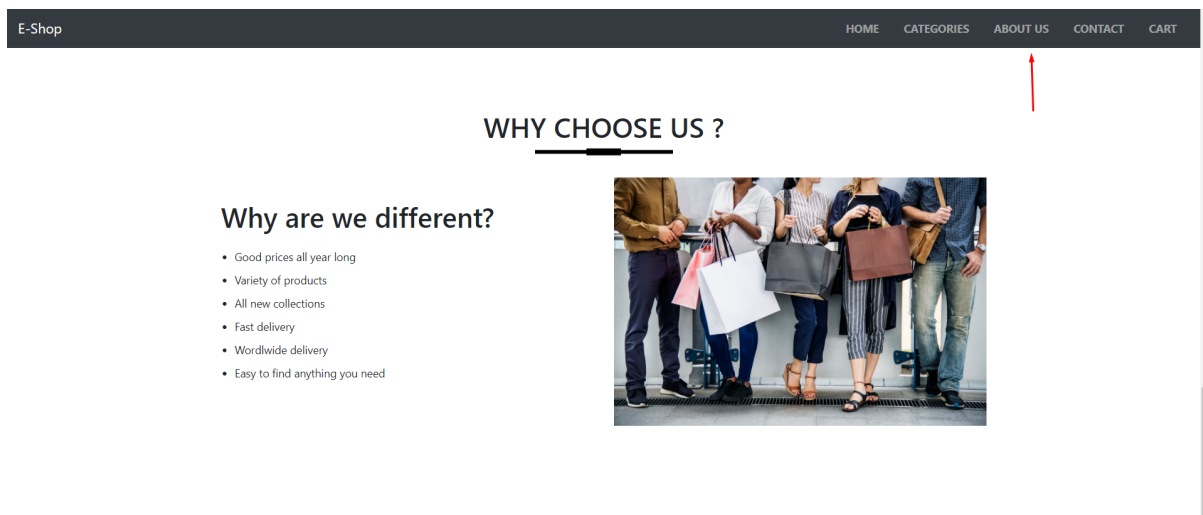

Here is a snapshot of an example list of products.

4 About Us

Our next tab it's indicated by a red arrow, "about us" section that describes who are we and why should you pick us to order your favourite shoes and apparel. For example, good prices all year long, wide variety of products and worldwide fast delivery make us competitive.

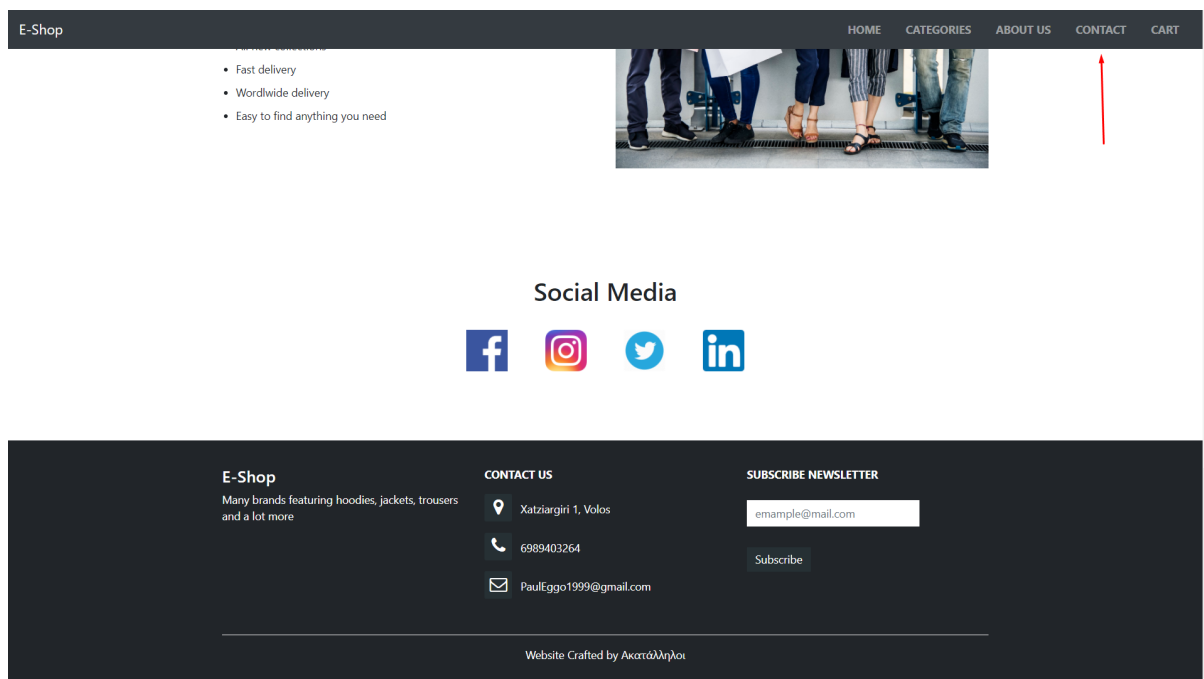

You know, we are the best!

5 Contact

A good store always takes care of his customers, so we have all our social media included at the bottom of the page. This way, our customers can message us whenever they want, if any problems arise. Also, the user can subscribe to our newsletter via the newsletter field, in order for him to be updated. Phone number, address of our warehouse and email are available 24/7. User can easily access the contact section by clicking "contact" button as you can see on the attached photo.

We wait our customer getting contact with us!

6 Cart

Cart button is also available at the top-navigation bar. User can see all the selected products. The user sees all the selected products, their quantity and their subtotal at the bottom. The total sum is calculated and the users sees the final price.

We have already enabled our black friday deals for the next week.
